Preface

BLStream Finger print is a set of practices applied in the company.

Project managment

Development

First Section

A paragraph followed by a simple list.

- item 1
- item 2

Here's how you say “Hello, World!” in Ruby.

A basic Ruby application

```
puts "Hello, World!" asdas sad as
```

TIP

asciidoctor-fopub takes the pain out of converting a DocBook file to a PDF file like this one. All you need is a Java Development Kit (JDK) and this project. The rest of the software is fetched and configured by Gradle.

Quality assurance

hello
