# Development

## First Section

A paragraph followed by a simple list.

- item 1
- item 2

Here's how you say "Hello, World!" in Ruby.

*A basic Ruby application*

```
puts "Hello, World!"
```

**TIP**

asciidoctor-fopub takes the pain out of converting a DocBook file to a PDF file like this one. All you need is a Java Development Kit (JDK) and this project. The rest of the software is fetched and configured by Gradle.
